

EXPERIENCE

Software Engineer Level - II

Envobyte Ltd.

Jan 2026 – Present Khulna, Bangladesh

- Promoted from Software Engineer (Level I) to Level II for strong technical performance, ownership, and contributions to projects.
- Design, develop, and maintain multiplatform mobile applications for Android and iOS using Compose and Kotlin Multiplatform (KMP).
- Implement In-App Purchases using Google Play Billing and RevenueCat.
- Build backend for mobile app using Ktor, Firebase & Cloud Functions.
- Collaborate closely with product managers, backend, designers, and QA engineers to plan, develop, and release new features.

Software Engineer Level - I

Envobyte Ltd.

Sept 2025 – Jan 2026 Khulna, Bangladesh

- Implemented Figma UI designs using Jetpack & Compose Multiplatform.
- Applied Clean Architecture, Koin DI, and MVI/MVVM to build scalable, testable shared Kotlin Multiplatform codebases.
- Collaborate with senior team members to implement features, optimize performance, and maintain code quality.

PROJECTS

ImproveType (AI Keyboard for Mobile Devices)

kotlin, koin, ktor, generative ai, firebase, mvvm, clean architecture

October 2025 – December 2025 Google Play

- Build N-gram language model for word suggestion & next word prediction.
- Implemented smooth predictive typing with efficient memory usage.
- Built Smart Auto Reply and AI-powered writing assistant for instant grammar, and tone rephrase.

Turner: Live Voice Translator (Android & iOS)

kotlin, swift, jetpack compose, kmp, rest api, edge-ml, play billing, mvvm

December 2025 – February 2026 Google Play App Store

- Implemented on-device ML and Google Cloud Vision for low-latency, real-time image-to-text and voice translation.
- Integrated Google Play Billing & RevenueCat to enable in-app purchases.
- Optimized low-latency, real-time processing across Android and iOS.

ReadOut (Android, iOS & Desktop Application)

kotlin, swift, jetpack compose, kmp, ktor, koin, rest api, sqlite, mvi

November 2024 – January 2025 GitHub

- A KMP app for discovering books, streaming audiobooks, and generating AI-powered summaries. Provides access to 28M books, 20K+ audiobooks.
- Integrated Gemini, LibriVox, Open Library & Google Cloud TTS API.
- Recognized for high code quality in Kotlin Multiplatform Contest 2025.

EDUCATION

BSc in Computer Science & Engineering

Metropolitan University

May 2021 – Apr 2025 Sylhet, Bangladesh

SKILLS

Kotlin Swift Java Python C/C++

Android Development Jetpack Compose

Compose & Kotlin Multiplatform Ktor

Firebase RESTful APIs Web Scrapping

SQL Git GitHub Unit Testing Agile

ACHIEVEMENTS

- Employee of the Year (2025) - Envobyte Ltd.
- Rising Talent - Upwork (Top 5% freelancers)
- Champion - MU Programming Contest (2022)
- 1st Runner Up - MU Robo Fest 2.0 (2023)
- Winner - 40th National Science Fair (2019)
- Winner - Children’s Science Congress (2019)

ACTIVITIES

- Open Source Contributor & Maintainer - OneDroid (Jan 2025 – Present)
- Technical Writer - ProAndroidDev (DroidCon)
- Participated in the ICPC Asia Dhaka Regional Preliminary Contest (2021 & 2022)
- Participated in Kotlin Multiplatform Contest
- Programing Workshop Instructor Metropolitan University (Feb 2022 – Apr 2025)
- Competitive Programming Profiles – LeetCode HackerRank | Codeforces | StopStalk

CERTIFICATION

- Python Programming & Basic Data Science
- Android App Development - Bohubrihi
- Kotlin Programming Language - Amigoscode
- Fundamentals of Swift Programming - Alison
- Java Programming Language - HackerRank
- SQL (Basic) Certificate - HackerRank

LANGUAGES

- Bengali (Native)
- English (Professional Working Proficiency)
